Inter-Agency Coordination:

In December 1969 on the poster operation and, in general, on the fact that we have a poperation potential. No agents or instrumentalities were identified. When he believes that a particular operation is in fact an erration is apt to query COS accordingly. If the operation is ours, we admit to it. If we are in doubt about the overall advisability of a planned operation we discuss it with beforehand and act accordingly to advice or instructions.

Costs

29. Need for Increased FY 1970 Funds: Through 31 March 1970 our expenditures in the were within the budgetary limits set forth in the project amendment budget estimate. Through care in planning and control we can continue to stay within our budget during the fourth fiscal quarter for the purposes of fiscal exercise. However we must increase our spending in the project amendment budget estimate. However we must increase our spending in the project amendment for the deficiencies or even complete lack of anti-Communist and effective non-marxist propaganda by non-communist political elements in this country. We must also triple or quadruple our poster and handbill coverage if we are to take advantage of

Finally, we must now increase the quality, and therefore the cost, of our printed material which for economy and cover reasons has been consistently drab to date. By our estimate we must not only increase our budget by for the remainder of FY 1970, but must also raise our FY 1971 funds by in order to be prepared to spur mass public pressure on the Congress if, as it now looks, the electoral decision is left up to the deputies and senators. The following cost estimates contain the budgetary increases under "printing and poster team expenses." It is requested that the Project be amended to permit increase for FY 1970.
